Title:

Comments: Hello, my name is Caroline, this project is important to me because I feel very connected to trees. Trees provide a home for all kinds of live from snails to mountain lions to moss to funghi to birds, and those creatures deserve to be left in the peace of their home. Our environment is delicate and precious and should be treated as such. It is certainly not worth destroying for a quick buck. "Job creation", the excuse corporations love to use, is not a valid concern when there are other sustainable tree-harvesting methods available. I'm sick and tired of the masses having to sacrifice our beautiful pristine nature for a corporation we will NEVER benefit from. Where is our government? Your job is to protect us, our interests, and the health of our environment. Do your job or live with this legacy as thr weight of guilt on your back. No excuses, do the right thing.
