Comments: The Heber horses has been managed by a group of inept individuals that don't have idea how to humanely manage a heard .

The Salt River Wild horses management group have implemented some very wonderful ways to care and make sure the herd stays manageable and healthy without round ups and inhumane practices .

Please , those horses deserve a chance . Don't separate them to have them suffer . They are beautiful beings and souls that have their own families. Please consider other people who is knowledgeable to manage the heard and have a beautiful symbol of the area .
