Comments: Please do not log this beautiful forest! I've been hiking and camping out there for 10 years and it has saved my life! I struggled with suicide and depression my whole life and when I started hiking in these forests, my life forever changed. The beauty out there is remarkable and by logging you will ruin my sacred place and so many other peoples sacred place too. Not only that, but think about the affect that it will have on the wildlife ?? This is supposed to be National Forest that is protected so that everyday people can go out and enjoy it. We're losing so much of this sacred land to logging and building projects... soon there won't be anything to enjoy. That area saved my life. I beg you to please not log it.
