Title:

Comments: Hello,

My name is Malea Muñoz and I am writing to you today to urge you to conduct an EIS and NOT go forward with Alternative 1.

This is important to me because we must protect and conserve our environment and ecosystems. Alternative 1 is detrimental to our environment and community. Clearcutting affects climate change, something that has been looming over us for decades and causing real harm to people today, not just future generations.

Do NOT go forward with Alternative 1!

Make a better tomorrow,

Malea
