Comments: As a citizen of Washington State and an environmentalist, this project has me deeply concerned.

Clear cutting in the proposed project area could mean disaster to the Nooksack River and it's Salmon populations due to erosion. Overall, Clear cutting has played a huge role in our forests biodiversity loss and habitat degradation. I, like many others urge the USFS to reconsider a plan that doesn't include potential harm to the Nooksack River and surrounding ecosystems, a plan that will leave our forests standing and Clear cut free.
