Comments: I totally oppose the roundup of these beautiful wild horses. This is a terrible way to treat these majestic horses!! And it's all because of the cattle ranchers wanting cheap grazing lands!! This land belonged to these wild horses before the cattle were brought in. They should be allowed to stay on the lands that they have lived on forever. If you want to be a cattle rancher, then you can supply your own food for your stock!! Do not let these horses be removed from their own lands!!
