Comments: The Heber Wild Horse Management plan should be ruled invalid and will be.

. Proposals to manage the wild horses by a professional non-profit group were posted correctly on this website and was ignored. The Cloud Organization submitted a proposal that is based on humanely and genetically responsible birth control. Why did you ignore this proposal? I know that Forest Service Employees have been abusing the horses that they are supposed to protect. I know that they are getting away with it. Do you ant idea how many people are OUTRAGED about this injustice?? Did you know you are responsible for an entire community's pain and anguish over this farce??
