Comments: These lands are public, and therefore should be used in a manner that the PUBLIC sees fit, NOT BY CATTLEMEN who use our public lands for their own private monetary benefit. We pay for these lands! I am so tired of seeing our public lands used just for the selfish purposes of a few opportunists who proceed as if they own this land, and not for the greater good that does pay for these lands through taxes. Nor do I appreciate local officials, and state and federal politicians, who ignore what the public is asking for. These animals provide tourism dollars and a love for our wild horses. Controlling them with birth control methods that are proven effective, or by regular adoptions, is a smarter way to manage the herd, not uproot or simply kill them, just so a few more cows can graze.
