Comments: The Heber wild horse plan has set the acceptable level of horses at just 50-104 wild horses on 19,700 acres. That's just one horse for every 394 acres. Cattle on the other hand are permitted 5,730 Animal Unit Months to graze within the Territory. I feel the Forest Service must allow horses in the Territory their fair share of the resource.

Thank you for your time and consideration regarding the wild horses in the Heber wild horse territory.

Most sincerely,
Eileen Daniels
