Comments: I am sick and tired of the fat-cat cattlemen being able to fatten their cattle for profit on the public's dime and at the expense of the mustangs. Why doesn't anyone realize the tourism dollars brought in by the mustangs? I guarantee no one is spending their vacation time and dollars to visit someone's future steak on the hoof! And cattle do way more damage to grasslands than horses do. Stop with the bowing-down to the cattlemen and think about the future-and I don't mean future SUPPERS!
