Re: Heber Wild Horse Territory Plan #18916

I vehemently disagree with your plan to downsize this herd to ridiculous levels. It appears you are constantly favoring your buddies the cow barons who do not require this extra territory but have an ever-lasting lust for more so they can be lax in their own land management programs. I am extremely tired of observing the mistreatment of wild horses, herding them with helicopters and utilizing unsafe and primitive sterilization methods to control herds (BLM). Please stop this insanity. It doesn't need to be this way. Wild horses are beautiful creatures (more so than cows who add incredible amounts of methane (factory farms) to an already polluted and climate challenged country. Show more respect for other living creatures and take the time to achieve better problem-oriented outcomes!!! Stop this.....PLEASE!!!!
