Comments: America's beloved wild horses should be allowed to remain wild and free on land that has been theirs for many, many years. They are icons and are America's horses. Their population can be managed through darting, Not IUDs, which are risky and could cause complications in the mares out on the range. They are our heritage. There is more than enough land to accommodate both our wild horses and any livestock on the range. It is such a shame that they are being "managed" in this manner, with so many horses being rounded up and sent to slaughter. Share the range. Please allow our wild horses to remain free. Once they are gone, they will be gone forever and that would be unforgivable. Is that what the BLM wants as their legacy? Please keep America's wild horses, our much loved wild mustangs, free on their land. And the wild burros too. Thank you.
