Comments: Though I live on the East Coast, I was upset to hear that this herd of horses is on target to be reduced even further, while ranchers are using more and more of this land for their cattle. These horses are the legacy of the citizens of the US and should be protected so that the herd can expand. Why should ranchers use this land and the horses be restricted even further. Something is wrong with this plan, please do everything possible to protect this herd, not decimate it.
