Title:
Comments: please stop taking the wild horses and burros off their lands. do you realize they control the echo system? without them coyotes and snakes come into our rural towns more and take our small pets. the burros protect our areas from these predators. it's natures balance. Half the time the blm round ups break up family units, which is a horrible experience for youngsters or pregnant mares. please don't do this. then you have slaughter house reps take to the auctions and buy so many animals and butcher these beautiful animals!! These animals don't deserve that! please just let them be free, sterilize if you must but let them roam or keep their sanctuary. please!
