Comments: The horses and burros that roam our wild lands such as those supposedly managed by the Forest Service, the BLM, or whatever agency, are NOT your property to do with as you please. These wild horses and burros belong to us, the American people, and we have them safeguarded on public property owned by us for a reason. I beg of you to leave our wild horses and burros to roam freely and live safely, just as you and I want to do. Please, please consider that these wild creatures are not yours to do with as you please.
