Comments: The public lands were set aside to to preserve the United
States treasures, whether land, spectacular places in nature or animals and historic sites. The BLM is suppose to protect and preserve these things, not kill them off to make a profit. The rich cattlemen continue to graze private cattle that they use to make a private profit at the expense of the lives of the horses that you are all being paid to protect. You need to get rid of the cattle that starve the horses out and get the highest penalties for those who shoot the horses. How dare you all not protect them. Americans fought for years to get them protected and everyone just runs over their right to live!
