Comments: I am so angry. Why the USFS believes it has the right to snuff out the lives of the American people's wild horses and prostitute our Federal lands in favor domestic livestock grazing has risen to an intolerable level. The American people are tired of the USFS and BLM destroying the future viability of wild horse herds and compromising their future status as enduring icons treasured by the majority of American voters. We will not stop fighting for them nor we we stop decrying their senseless, unnecessary slaughter. I encourage my sphere of friends and family to stop eating beef. Americans are so upset about how wild horses are treated, that nothing will assuage their rage short of a complete cease and desist of the Government's wholesale roundup and senseless internment of our beloved wild horses.
