Comments: As a long time volunteer for the USFS , I am completely embarrassed by the actions of my agency to feel the need to eliminate so many wild horses from the herber herd and leaving as few as 50 horses on a mass of 20,000 acres is absurd . Why would you spend the amount of \$\$\$ and the amount of trouble to undertake this disgusting practice when you could easily use the pzp darting method to control herd size. Just what has happened to the forest service . We are supposed to be here to PROTECT NOT DESTROY NATURE .. Alter the way you treat wildlife and get back to doing good not harm .
