Comments: I would like to comment enthusiastically in support of the USFS granting a full Permit to Points North Heli Adventures for new terrain for guided helicopter skiing in the Chugach National Forest lands adjacent to Cordova. I have been visiting and skiing with PNH for 9 years, and through their careful, thoughtful, and safe guidance have had countless days enjoying my National Forest Lands and the majestic vistas and recreation opportunities they provide. Because I have had the privilege of spending so much time in Cordova, I have also had the wonderful opportunity to enjoy everything this special town has to offer - kind friendly people, incredible scenery, and delicious food. If this permit is granted, not only will I have fresh reasons to continue coming to Cordova to support the local economy, but also an entirely new generation of visitors will follow in my footsteps and be able to enjoy even more of their public lands as guided by the professional staff at the best heli ski operation in the business - PNH. Thank you.
