Title:

Comments: As a citizen, I am opposed to the roundups of wild horses to open grazing land for cattle. I am opposed to stock piling horses for years in inhumane corrals that serve as confinement. I have seen these Mustangs end up in kill pens due to the \$1000 incentive plan.

The horses are being managed successfully by darting for sterilization. I am against the millions of dollars wasted on this horrible cycle of culling the wild horses.

I want to hear from the new Interior Secretary on her views now. Is she in agreement or is she evaluating this terrible ongoing situation?

I look forward to hearing from her on a public platform.
