Title:

Comments: Please stop removing these horses from their land. There is more than enough land for these horses and the cattle to share. It is unnecessary to reduce the horse population, let them roam free and wild they are not hurting anyone or taking up space from the cattle. And please stop the senseless killing of these horses! It's been going on since 2018. I don't understand how wild horses and burros are such a threat to humans. There are millions of acres of open U.S. land to move about yet our government only sees dollar signs. Leave these animals alone, they are not yours to destroy!
