First name: Janice

Last name: Steely

Organization:

Title:

Comments: The forced removal of these iconic animals should be considered a deep loss to the people of Arizona as well as yet another affront to the sensibility of your organization. The government should work towards helping these last remaining herds be rewarded for their sustainability and adaptability where other species have sadly not survived. Allowing government land to be overrun with cattle is not necessary or economically feasible. Please look into other more humane and practical ways of allowing OUR wild horses to live peacefully into the future.
