Comments: I'm a big supporter of environmentally sound businesses and this one being in a "No Road" town which encourages walking and patronizing local businesses is very good for our environment. The footprint of this skiing access is also low impact on the environment. Access to this spectacular scenery and country with low/zero footprint is a double win for visitors and the environment. Exposure of people to a "no footprint" lifestyle is a multiplier effect as well.

I strongly support this project.
