Title:
Comments: skiing in the new permitted area opened my eyes to the beauty and vastness of the glaciers and terrain of the Chugach. Our ability to take photos and video in the are will spread the knowledge of this area to the world and let them know how incredible and valuable it is to mankind. It is a rarity to be able to explore the terrain and I feel lucky to have had the opportunity. Treading lightly, respecting nature and leaving no trace is a must.
