Comments: The plan to only have 50-104 horses on 20,000 acres does not leave them with a genetically viable pool. There has been illegal "hunting" of these horses in the forest & no action taken to stop it!!! There are groups & individuals who visit herds of wild horses in order to photograph them. There are dedicated advocates for wild horses that do the PZP contraceptive work that BLM doesn't do. There is a large group of Americans who DO NOT want to see wild horses disappear!!! We don't want them sold for food, we don't want them chased off the land just so cattle & sheep can be moved in.
