Comments: I would like to know why, with all of the cries against the removal of our wild horses, cattlemen get their way? "We the people" don't care about your determination based on feeding cattle. "We the people" want our horses allowed to be free not torn apart for the greed of a few men. There are people who care enough to see that the numbers would be stable using fertility darts. We do it here in the Salt River Management of our horses. I'm so sick to death that your administration doesn't listen to those of us that these horses really belong to. You should be forced to put to a vote what the people want done with their wildlife. It should never be left up to those listening to money makers. Our wild lands and animals should never be sold or leased to the point that we lose the lives and natural families of these animals to appease men. The BLM is extremely lucky that the American people don't realize what you're doing behind closed doors. 90% of Americans would stop you. Also, the numbers that you would leave for a herd there are untenable. Genetic viability wouldn't even exist. The cattlemen and their greed can take a flying leap. Leave our horses alone!
