Comments: I object to the horse removal.

1. The proposed plan sets a low AML with a projected 50-104 horses on 19,700 acres.
- 2.. with the new ALM wild horses are permitted substantially less animal unit months than cattle for grazing. Adjustments need to be made.
- 3.PZP should be used for fertility control. It has 30 years of proven efficiency.
4. Many wild horses are outside of territory boundaries. The Forest Service should relocate those horses to within the boundaries.
5. If removal must occur, it should be done through bait trapping and in a timely fashion to meet adoption demands...not to add to the thousands of horses already in off range holding pens.
6. The Herber horses are being illegally killed. The people responsible need to be held accountable.
