Comments: Dear Sirs: I am writing to ask that you do NOT proceed with the planned roundups of these mustangs. They are not being allowed enough grazing room; in comparison to the livestock run on these same lands. The livestock allotments should be reduced; and the number of mustangs kept on this range increased; to allow proper genetic diversity among the wild horse herds. Birth control darting can be used for birth control... it has a proven effective track record. Thanks for your consideration. Julie Hansen.
