Comments: For what ever reason you have forgotten what this part of the state was founded on. Let me remind you farming and ranching. I feel that there is a push to get rid of agricultural just to satisfy the greedy pockets in Denver and in LaPlata county. By this I mean you are doing what ever you can to satisfy all of the recreational activities in this area. Purgatory has more than ample areas of skiing. You are in the process of taking grazing land away that is vital to keep summer grazing adequate for providing sustainable land for cattle and sheep. I object to this project as it will pave the way to reduce more and more land that is allocated for summer grazing. Thank you
