Title:
Comments: I object to Purgatory #57877 because I understand
1. you will be displacing a long time local cattle herd used to practice range undergrowth management,
2. You are destroying 2 major water sources for wild animals in the area.
3. You are negating signed range grazing management contracts with local ranchers without compensation for the various improvements or adequate replacement grounds.

Does the forest service get to go back on its word to local contract holders simply to earn more money? Our local farmers & ranchers are the backbone of our community & when you treat them with such disrespect & ignorance you are treating us all the same way. And destroying precious water resources when we've been so dry these past few years seems short-sighted at best, and criminal at the worst!

Do not allow this project to go forward!!!
