First name: Pete

Last name: Swenson

Organization: Town of Frisco

Title: Nordic and Trails Manager

Comments: The Town of Frisco supports the vegetation management activities as described within the White River Aspen Management Project. The Town is requesting advanced notice from the Forest Service regarding timing and areas of aspen treatments. Aspen stands visible from the Town of Frisco form an intrinsic part of the Town. There is significant recreational use of trails and roads in aspen stands. Apprising residents and visitors of the need for these treatments will be important in managing public perception of altering a highly visible resource.
