Comments: The Wild. horse population is a part of the American West history and a part of AZ history. We should be protecting these animals to a reasonable ability by the forest management and help by the public. Everyone I have talked to about the Wild horses of AZ are excited about it, they want to see them and many are willing to assist with providing care when needed. Animals are also a part of our being here on this earth and humans need to remember to share their space and Not take away all of their natural habitat. Please help the wild horses of Heber area. There are only a few places left for them to be free. Let's Not take it all away. Let's be here to make sure they have their freedom.
