Comments: Culling this herd is not managing the herd. The Forest Service is on a mission to erase this herd off the map. This is against the Congress' 1971 Wild Horse and Burros act. It's disgusting that this is even a subject of discussion. And the plan of removing and sterilizing these animals is barbaric at best. Politics ensues and we all know who it's about money and cattle grazing. Why don't you just come out and say it instead of all the smoke and mirrors. By the way, don't you work for the people? The majority of the people I know in the area think the same as I do.
