Comments: I am excited to see the mountain bike trail build in the Peabody West project. I am hoping this project could connect up with the trail system at Great Glen Trails and eventually up to AMC. This could create great opportunities to connect all of that history back to Gorham. People could ride (not drive) from Gorham and grab lunch in the Notch and ride back- it would be a special experience. The same could happen in the winter- ski from Gorham all the way to GGT or AMC. It would be even better if it could be (at least one trail) groomed in the winter. It would open up how many people could access this great area. Thank you.
