Cordova Ranger District Guided Helicopter Skiing Project #59615

This should be awarded to a company based and solely operating in Cordova. Recently a contract was awarded to Silverton Heli for an area outside of Seward. It would be interesting to see how many days they actually used this location. We need an operation that is committed to helping the Cordova economy as much as possible. This does not mean flying over from another location when a client wants something new or conditions are better. I have no objections to rewarding this contract to Points North. As a backcountry skier and resident of Cordova I have found them to be beneficial to our community.

I would like to see a slight revision of the proposed area.

chop of the southern portion of 12. Just continue the north boundary of the NNF area to the east to the west

I think this will eliminate future conflict with backcountry tourers who may use this area.

Thank you
