Comments: Hello,

I would like to provide comments regarding the Cordova Ranger District Guided Helicopter Skiing Project.

I was a customer of the Points North Heli-Adventures (PNH) a few years ago and am supportive of their efforts to gain a permit to access the areas outlined: <https://www.fs.usda.gov/project/?project=59615>

My experience with PNH was outstanding. Their staff clearly cared about the safety and well being of their guests as well as the environment they were operating in. Their operations were respectful of nature, focused on the safety of their guests and staff, and ensured no or minimal traces of impact of our presence in the areas we visited for our heli-skiing.

PNH provided me with one of the most amazing life-changing experiences I have had in my entire life, and one that I talk about regularly, years later.

I do plan on returning to Alaska to participate in a heli-skiing adventure again, (with PNH if possible) and again to enjoy experiencing more of the wonders Alaska has in such abundance.

Please grant PNH their permit request and support their efforts in the future for respectful tourism that helps the Alaskan economy as well as drives up awareness of all the wonders of the Alaskan wild.

Sincerely,

Nico Posner
