impact on wildlife is major with this plan. it is a negative effect. no toxic chemicals should be used on any part of this national site owned by 330,000,000 americans. this is not the property of fs. it is the property of the entire population of the usa and our thoughts should be primary in plans for this site. no prescribed burning should ever be don eon this site. no hunting should be permitted. no trapping should be permitted at any time. no mining should be permitted on any part of this site. no logging should be permitted under any circumstances. no grazing shoujdl be permitted on this site ever. the grazers can go rent land at fair prices from private owners. the corruption of low prices that has been given to robber baron cattle robber is a criminal rustling kind of criminal act robbing the peopel of this nation for this favored site of clive bundys who think they are the only people that count in this world. as you can see there are 330,000,000others who count too. no new roads on this site. reducing stand diversity in factr will brin gin foreign invasives. it is not a good idea. trees KNOW WHERE THEY WANT TO LIVE. THIS COMMENT IS FOR THE PUBLIC RECORD. please receipt jean publee jean pubilc1@gmail.com
