First name: Sarah

Last name: Heath

Organization:

Title:

Comments: Please protect the Heber wild horses. They are part of our history of pioneering the Wild West. They are descendants of the horses that providing transportation, assisted in farming and reliable companions. Please do not forgot the past, they contributed to the building of railroads. We needed them and now in the modern world we value the beef industry and rely on automobiles. Let mother nature decide, they are natural survivors. Let's not intervene by killing and capturing the mustangs to the point of extinction. Let them roam the earth, way may need them again one day, if technology fails us.
