Title:

Comments: Your plan for these horses does not allow for enough horses to remain and thrive as a herd.

Rounding them up and sending them to holding pens is cruel and abusive. They deserve to live in the wild more so than the livestock that are allowed to graze in much higher concentrations. Humane effective methods of birth control should be used if needed. If any horses truly needed to be removed, it should be at a rate that is viable for them to be adopted to a proper home. It breaks my heart to see what our government is doing to such an icon of America.
