First name: Alan

Last name: Reynolds

Organization: Shareholder of public lands

Title:

Comments: There are very specific guidelines for management of public lands which include NO degradation of the resource. We overpay the FS and BLM to manage the resource for the best interests of the OWNERS, not to bend over for the short-term interests of welfare ranchers. Go back and review the management guidelines and directives and justify every land management decision to the shareholders or get another job. The collusion with grazing PRIVILIGERS has been abused for one hundred years and needs to be stopped. The land does NOT belong to you, you are the hired managers. Do your jobs.
