Comments: Public lands are for native "public" wildlife. NOT for domestic non-native wildlife.

Having lived in the Western states most of my life, I've witnessed the destruction of our native ecosystems and total disregard of native wildlife and native wildlands by cattle ranchers. It's time to remove livestock from our public lands and to hold the livestock industry accountable for all the damage they've inflicted on our public lands. I ask that you formulate a plan to remove livestock from our public lands. Respectfully, Gerald Black
