Title:

Comments: Our environment is precious and our survival depends on it. We assault the environment with impunity and the day of reckoning is nigh at hand with climate change threatening our survival on this planet. We must, must, must protect the environment to protect ourselves. Please do the right thing by our national forests! People must be accountable for the damage they cause to the environment. Trump and his buddies didn't care but reasonable people do!!!!!! We must protect our resources and not recklessly exploit them.
