Title:

Comments: It is absolutely imperative that you do not allow expanded grazing on USFS controlled land. The consequences are unacceptable.

The country has booted Trump out of the White House and we do not approve or support and further implementation of his disastrous anti-wildlife and anti-wilderness policies. He was the worst president in our history and his pro-business bias caused massive damage that may never be repaired.

The USFS has shown blatant disregard for wildlife and protection of public lands in so many places. You must stop this headlong charge into the destruction of our planet's future.

Thank you.
