Comments: The Rangeland Management Directives have the potential to significantly affect millions of acres of public land, including Wilderness, where livestock grazing is fundamentally at odds with the mandate of the Wilderness Act.

Livestock grazing on National Forests significantly degrades our public lands. Impacts from grazing must be fully examined and addressed through a transparent, public process that complies with federal laws, including the National Environmental Policy Act. Please ensure the agency will maintain authority for grazing management decisions and hold grazing permittees accountable for the impacts their livestock have on public lands.
