Comments: Instead of increasing livestock grazing on public lands, the Forest Service should allow vacant allotments to be permanently closed and should protect Wilderness, other public lands, and wildlife by limiting, rather than increasing, inappropriate livestock grazing in National Forests. Increased grazing would not only fuel livestock grazing's contribution to the climate and biodiversity crises, but runs directly counter to the Biden Administration's 30x30 land conservation agenda by sacrificing what could be protected lands to the commercial livestock industry. Please do not allow this.
