Title:

Comments: We urge you to stop this before it is too late, and time is short. The impact of grazing by these massive numbers of cattle cannot be properly managed and will be extremely detrimental to the environment. The public lands belong to all of us and they should be treated as the treasure they are. Please preserve these spectacular natural spaces for all future generations. We are counting on you. Protecting the environment is a key reason I worked hard to get this administration elected. Please don't let us down.

Thank you.
