Comments: This leftover Trump administration proposal to increase grazing would not only fuel livestock grazing's contribution to the climate and biodiversity crises, but runs directly counter to the Biden Administration's 30x30 land conservation agenda by sacrificing what could be protected lands to the commercial livestock industry.

The Forest Service must help protect Wilderness, other public lands and wildlife by dropping its proposed Rangeland Management Directives.

If the Forest Service wishes to amend its directives, the Forest Service must undertake a more comprehensive rule-making process that complies with the National Environmental Policy Act.

THank you for your consideration.
