First name: Howie

Last name: Wolke

Organization: citizen

Title:

Comments: Do not adopt the Trump Administration's changes to grazing regulations. Keep vacant allotments, both within and outside of Wilderness vacant. In fact, consider retiring all livestock grazing allotments in designated Wilderness. I am a retired wilderness guide/outfitter who has also worked as a cowhand in the livestock industry and livestock grazing is simply not compatible with good public land management in most situations. Thank you.
