Comments: Since these 'updates' were added at the end of trump's term and NOT in line with the majority of the American people's point of view - who as taxpayers - actually own these lands. The changes should not be codified since they are out of step economically to the treasury, out of step environmentally and definitely out of step with endangered species act issues on several levels. These 'directive' should, instead, be left as is until the procedures outlined have been re-examined with science and health in mind instead of corporate profits.
