Comments: Drop the proposed Rangeland Management Directives! Why are any domestic animals allowed to graze on ANY public lands? For one thing, they can spread disease to wildlife. Also, I mean, can I just go build a hotel or a house on public lands? I doubt it! Don't tax dollars from the public, including me, support public lands? I'm not getting any free beef out of this so I think grazing on public lands should be forbidden. I can't even believe it was ever allowed. Then these ranchers think they own the public lands, so "entitled"...it's completely inappropriate.

Thank you.
